What is cloud-native?

What is Microsoft Azure?

# Challenges of starting Cloud Journey

# Challenges of starting Cloud Journey

# Challenges of starting Cloud Journey

Hey Bing,  
how should I start  
my cloud adoption  
in Microsoft Azure?

To start cloud adoption in Microsoft Azure, you can begin by reviewing your Azure platform **readiness**. Assess your plan to create a landing zone that will host the workloads that you build in the cloud or migrate to it. Conduct an Azure **landing zone** review. You can also use the Cloud **Adoption Framework** getting-started guides to unblock your organization's cloud adoption efforts [1](#) [2](#) [3](#)

I hope this helps! Let me know if you have any other questions.

# Overview of Microsoft Cloud Frameworks

# Azure Cloud Adoption Framework (CAF)

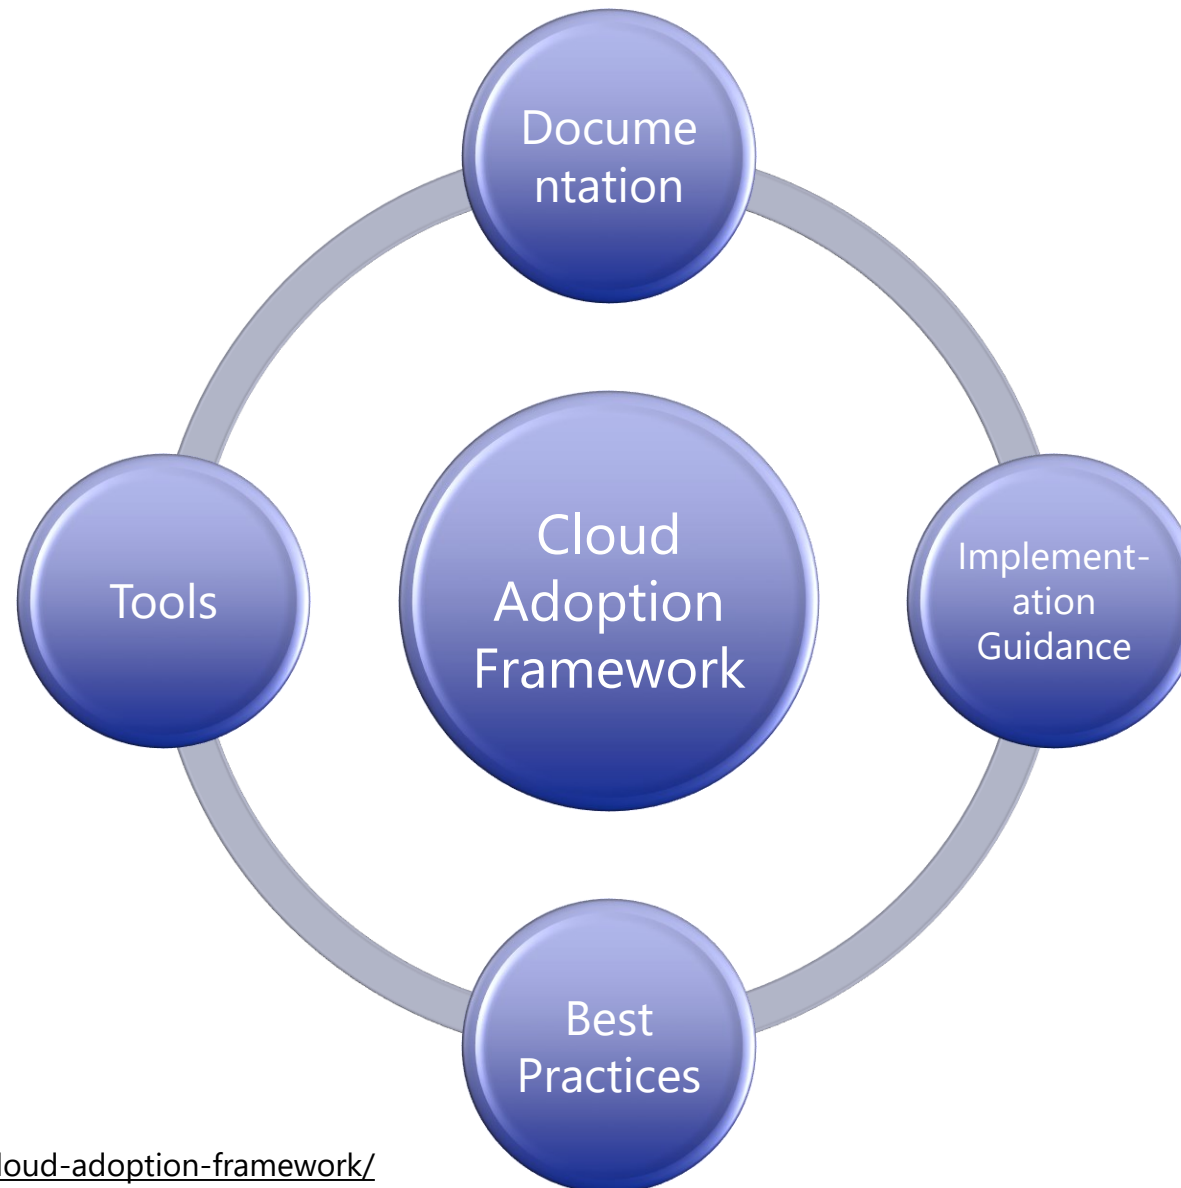

„The Cloud Adoption Framework is a collection of documentation, implementation guidance, best practices, and tools that are proven guidance from Microsoft designed to accelerate your cloud adoption journey.“

# Azure Well-Architected Framework (WAF)

“The Azure Well-Architected Framework is a set of guiding tenets that can be used to improve the quality of a workload.“

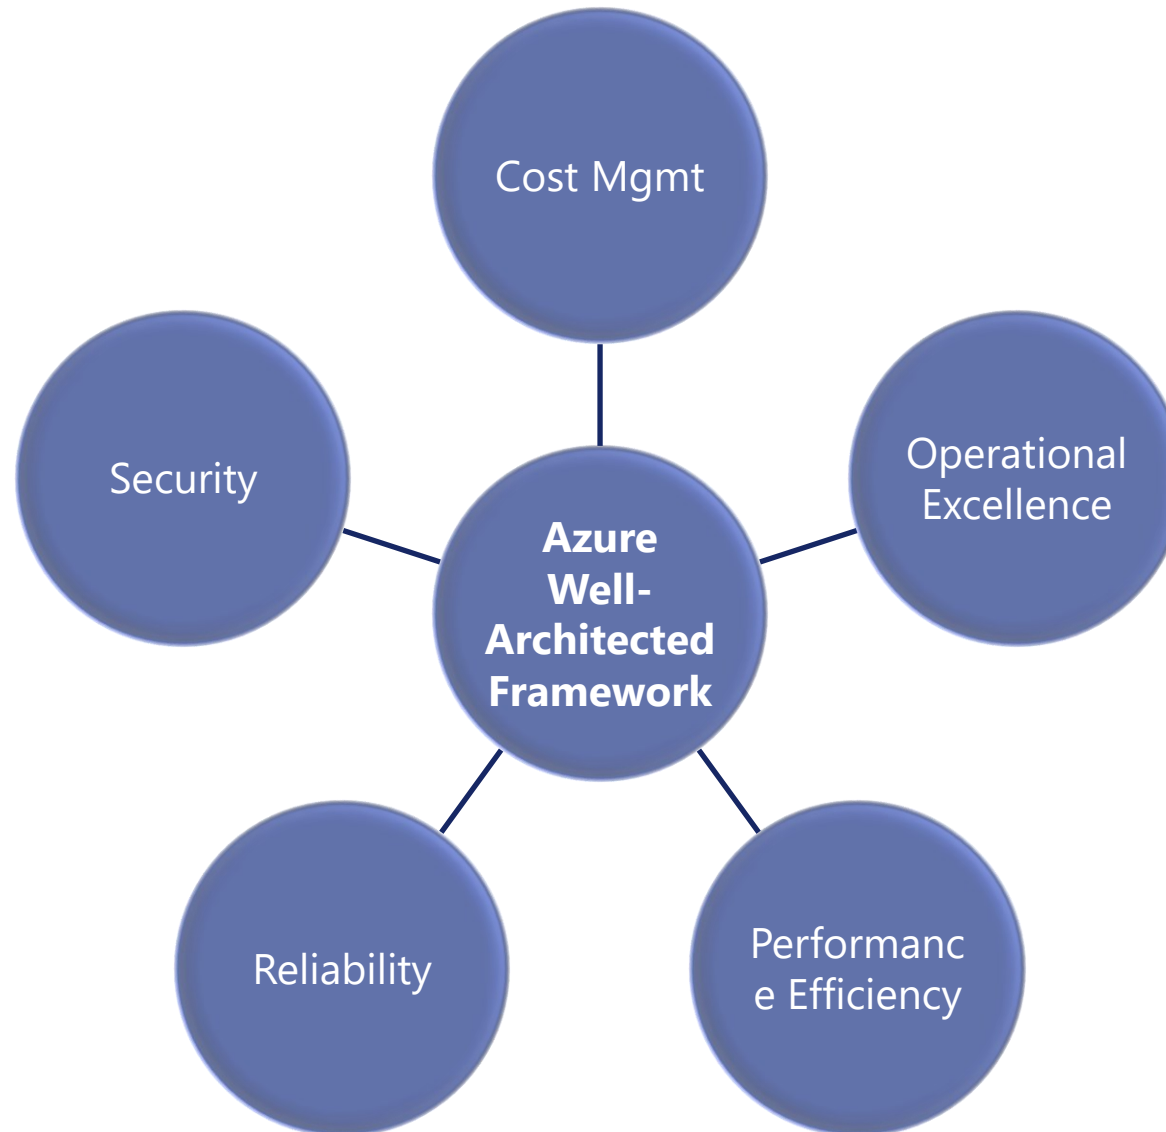

# Cloud Adoption Framework

# Well Architecture Framework

"The Azure Well-Architected Framework is a set of guiding tenets that can be used to improve the quality of a workload."

# Azure Policy and Defender for Cloud

# Azure Governance Architecture

# Azure Policy

- Turn on built-in policies or build custom ones for all resource types
- Real-time policy evaluation and enforcement
- Periodic & on-demand compliance evaluation
- VM In-Guest Policy

## Enforcement & Compliance

- Apply policies to a Management Group with control across your entire organization
- Apply multiple policies and aggregate policy states with policy initiative
- Exclusion Scope

## Apply policies at scale

- Real time remediation
- Remediation on existing resources

## Remediation

# How it works together

- All recommendations based on **Azure Policy**
- Secure score is result of Azure Policy settings
- Recommendations are a result of Azure Policy
- All Azure Policies are defined in Compliance mode
- Azure Policy settings will firstly applied when Subscription is created

# Microsoft Defender for Cloud

## Continuously Assess

Know your security posture.  
Identify and track  
vulnerabilities.

## Secure

Harden resources and  
services with  
Azure Security Benchmark.

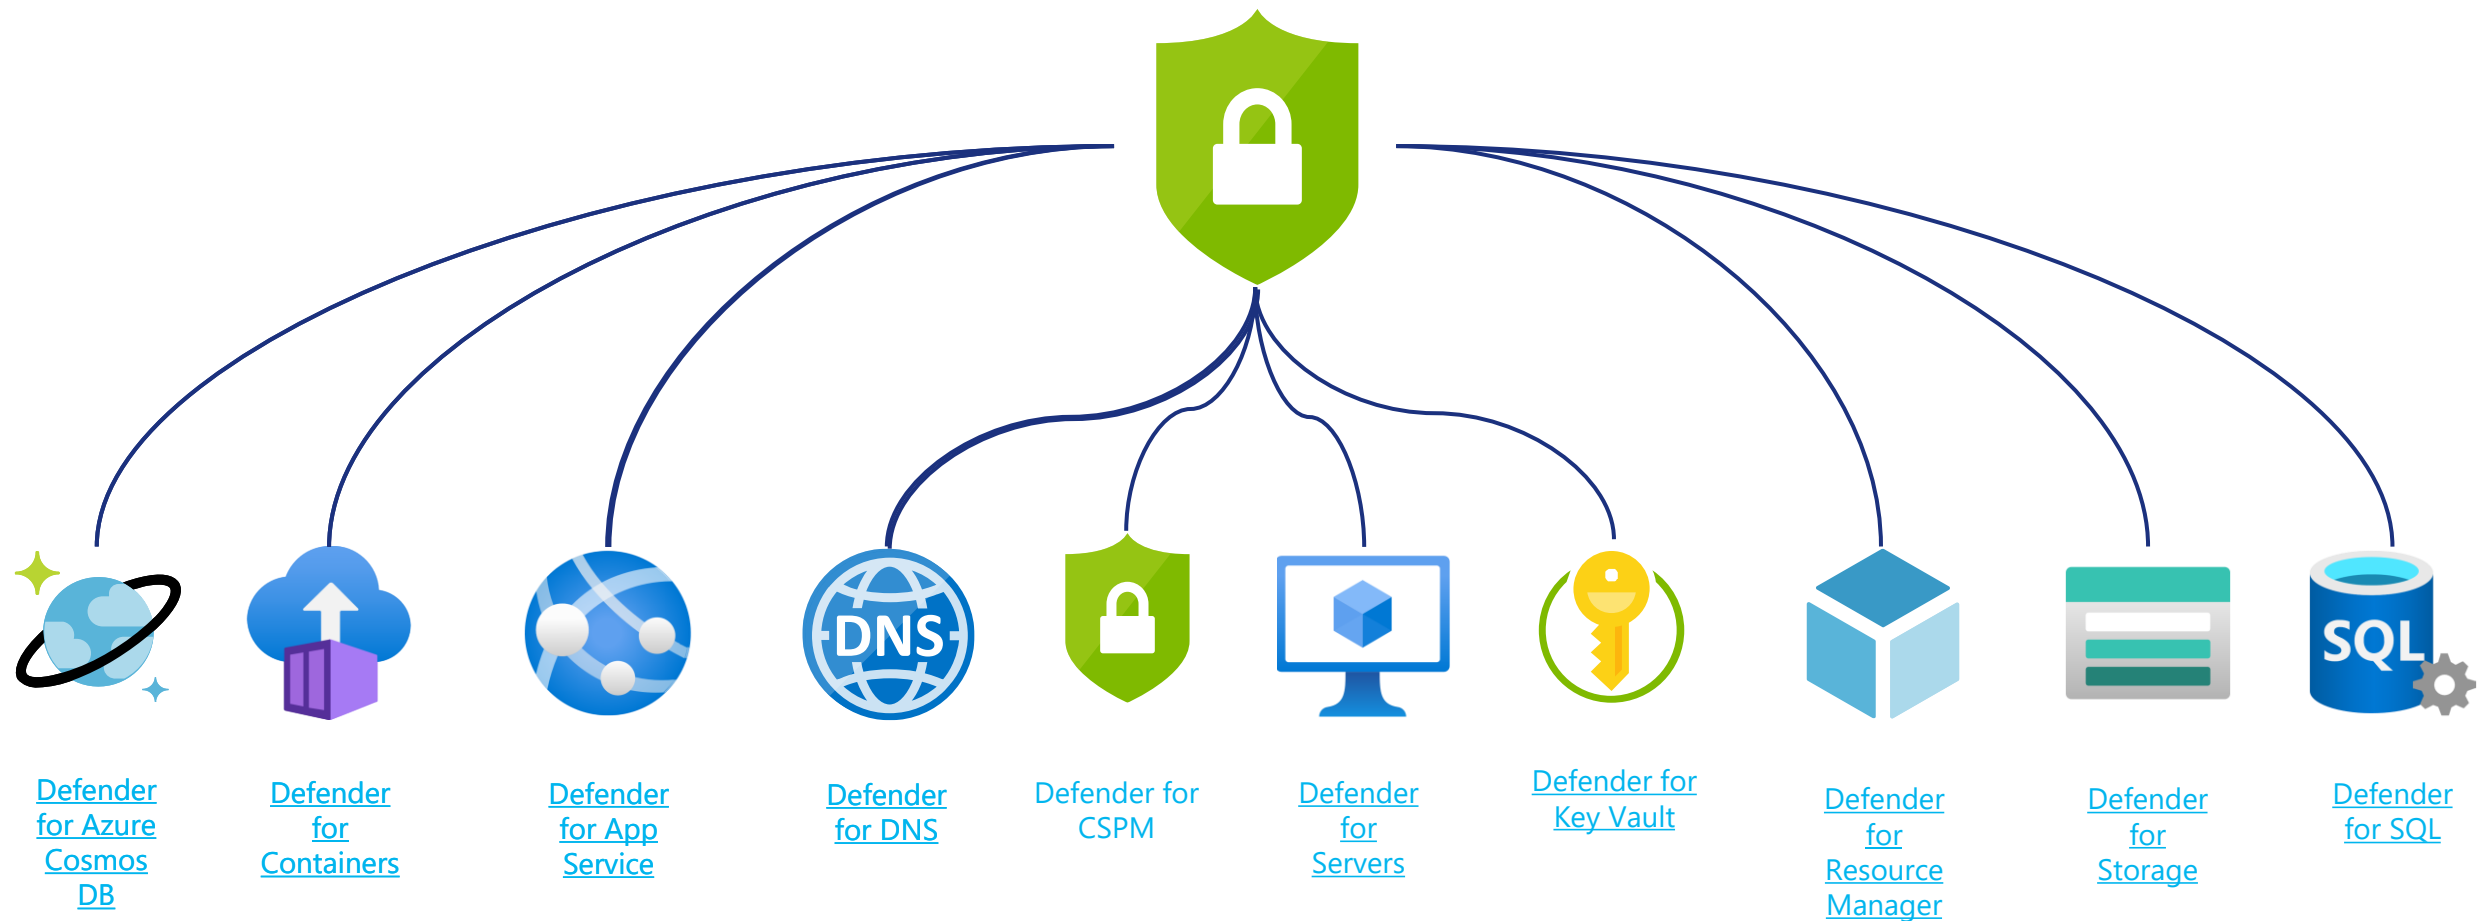

## Defend

Detect and resolve threats to  
resources, workloads, and  
services.
